Dear Mr. Daksh Soodini,

The Irrigation and CAD Department of Telangana State, India is pleased to recognize your outstanding initiative in founding Project Paani at Jawahar Navodaya Vidyalaya, Palair, Khammam district.

Your vision of a sensor-equipped smart greenhouse, where students learn to use data and artificial intelligence to save water and farm more efficiently, shows rare foresight and commitment for a student. Linking the greenhouse to the school's food programme reflects a practical and responsible approach to sustainability.

Your work supports the goals of Telangana Rising 2047, especially the responsible use of water and the modernization of agriculture. By bringing these skills to students from rural farming families, you have helped lay the foundation for smarter, more water-efficient farming in Telangana's villages.

The department appreciates your dedication and leadership, and commends your efforts to extend Project Paani to more schools. We wish you every success in your future endeavors.

With best regards,
